Rare Dedication

May 1, 2021

For the Cystinosis Community:

On the first day of Cystinosis Awareness Month, we at Leadiant Biosciences join the cystinosis community in raising awareness and recognition of the disease.

While cystinosis is rare, there are more than 2,000 people around the world who live with it. There may be even more individuals who are undiagnosed or misdiagnosed. It is essential to inform others about the disease and highlight the need for treatment.

At Leadiant, we understand that those living with cystinosis have needs that extend far beyond medicine. We are committed to providing educational resources to support the management of eye health throughout your lives.

Our Rare Dedication to the cystinosis community is stronger than ever. We have been with you for 20 years – through great progress and challenges – and we will remain with you.

Thank you,
Your Leadiant Team
